

REPORTS ON

TWO DAYS WORKSHOP ON NETWORK SECURITY AND OPEN SOURCE TECHNOLOGY

A workshop was organized by department of Computer Sciences and Seminar Organizing Committee, Govt. Zirtiri Residential Science College in collaboration with National Informatics Center, Aizawl on 9th – 10th August 2016.

All the students of BCA attended the seminar. There were four resource persons from NIC.

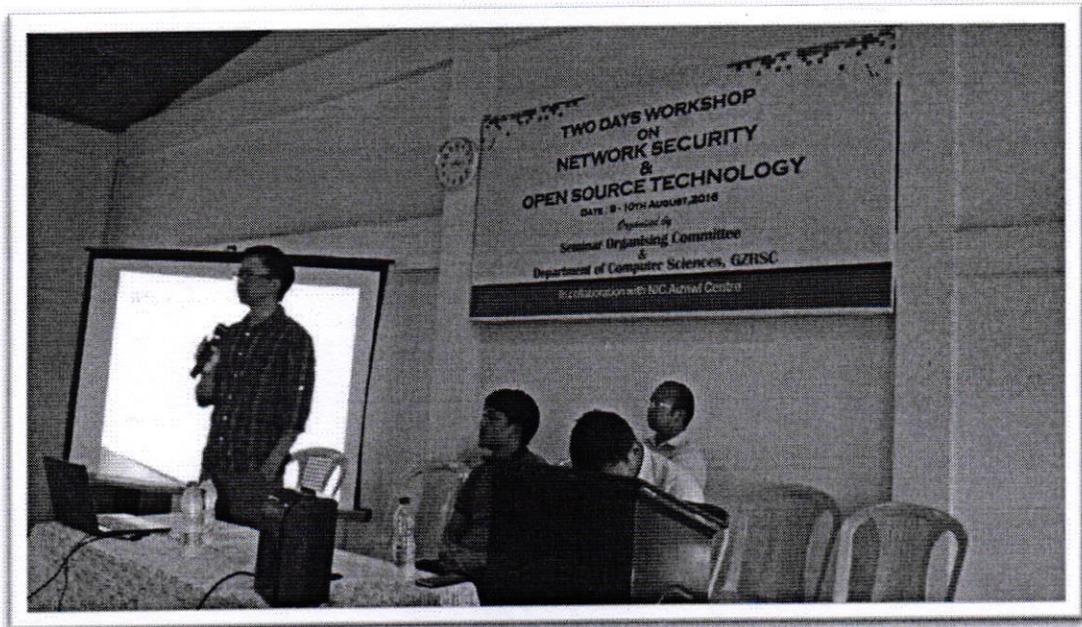

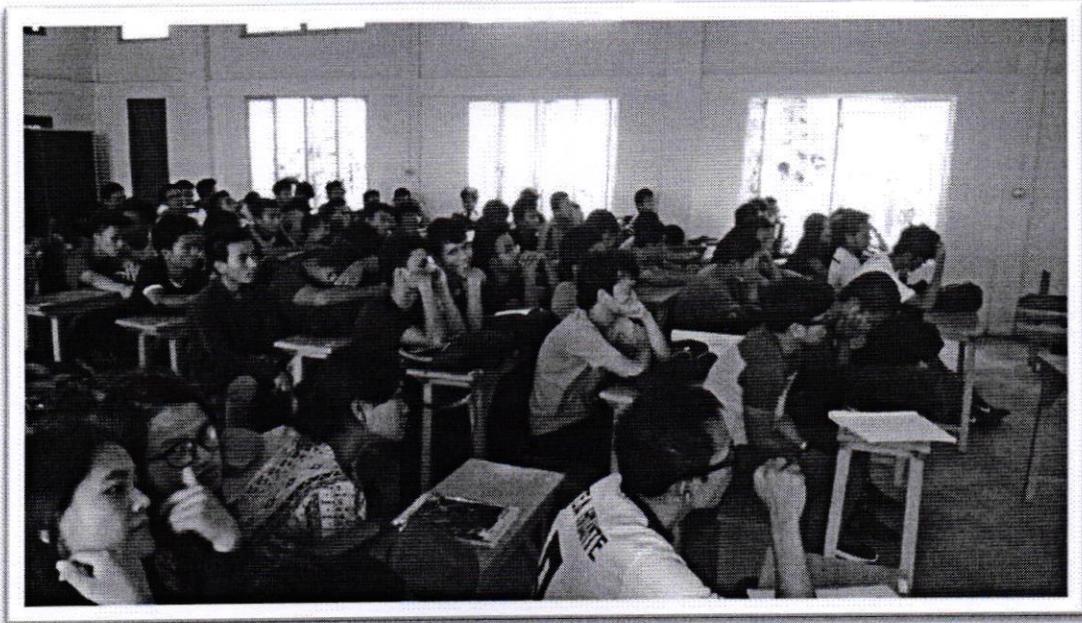

On the first day, the workshop was chaired by Miss M.S.Dawngliani, HOD, Department of Computer Sciences, GZRSC and on the first session, a topic on network security was taught by Mr. Francis Khawlhing, Programmer, NIC Aizawl centre. He explained a brief description of network security and the threats on network. He also highlights preventive measures to be taken to be secure on a network environment. The next session was about open source technology, the topic was taken by Mr. Jerome H Lalrinfela, Asst Programmer, NIC Aizawl Center. He talked about boot strapping and outlined some popular open source softwares.

On the second day, the workshop was chaired by Mr C Lalrinawma, Asst Professor, Department of Computer Sciences, GZRSC and on the first session, a topic on open source technology was taken by Mr. HC Rochungnunga, DIA, NIC Aizawl Center. He talked about Java Script, Ruby and several open source languages. He encourage the student to have specialized programming language for their future career. The next session was taken up by Mr. Rochamliaana, Asst. Programmer, NIC Aizawl Center. He talked about Cascading Style Sheets and dynamic web designing. There is an online and offline links so that the web developer can choose as per their own requirements. The workshop was closed with a vote of thanks by Mr. Lalhrulaitluanga, Asst. Professor, Department of Computer Sciences, GZRSC.

The students found the workshop helpful and enlighten them more in the field of information technology. They were introduced to various open source language and the threats and precaution to be taken in network environment. Taking the overall feedback of the students, they suggest to have more seminars and workshop activities beyond the syllabus so that their outlook may be improved and updated. The attendance of the students was also satisfactory.

The department would like to thank the principal and seminar organizing committee for the guidance and full support. We would also like to thank the four resource persons from NIC Aizawl center for sharing their valuable knowledge and skills to the students. Lastly, thanks to all the faculties of Computer Science department for the excellent cooperation in organizing the workshop and fulfilling each respective duties.
